Seasonally adjusted consumer confidence index and indices concerning consumer tendency, July 2021

The next release on this subject will be on August 23, 2021.

EXPLANATIONS

In monthly consumer tendency survey, consumers' assessments and expectations on financial standing and general economic situation, also their expenditure and saving tendencies are measured.

The consumer confidence index calculated from the survey results is evaluated within the range of 0-200. It indicates an optimistic outlook when the index is above 100, but it indicates a pessimistic outlook when it is below 100.

The increase in probability of borrowing money index, which is the one of the indices concerning consumer tendency indicates an optimistic outlook while decrease in index indicates a pessimistic outlook. Similarly, increase in assessment and expectation in consumer prices change rate indices indicate a decrease in assessment/ expectation in consumer prices and vice versa. The increase in number of people unemployed expectation index indicates decrease of number of people unemployed expectation, whereas decrease indicates increase of number of people unemployed expectation.
